

# Rushabh Jatin Dedhia

## Lead Frontend & UI Engineer

Mumbai, Maharashtra, India • [rushabh.lucifer@gmail.com](mailto:rushabh.lucifer@gmail.com) • (+91) 86528 21301 • [linkedin.com/in/rushabh-dedhia-ab108314b/](https://www.linkedin.com/in/rushabh-dedhia-ab108314b/)

---

### SUMMARY

Results-driven Frontend Engineer with over 6 years of experience building high-performance, responsive web applications. Expert in modern JavaScript/TypeScript ecosystems, specializing in React, Next.js, Vue.js, and Nuxt.js. Proven track record migrating legacy codebases, developing optimized IoT-compatible interfaces, and leading international engineering teams. Adapt at turning complex requirements into seamless, pixel-perfect user experiences.

### CORE FRONTEND EXPERTISE

**Frameworks:** React, Next.js, Vue.js 2/3, Nuxt.js, Angular 2

**Languages & Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, Tailwind CSS, Bootstrap

**Data Visualization:** D3.js, Plotly, Highcharts, amCharts, Google Maps API, Canvas API

**Testing & Tools:** Jest, React Testing Library, Chrome DevTools, Git, CI/CD, Bitbucket, AWS Lambda, Jira (Sprint Planning)

### PROFESSIONAL EXPERIENCE

#### Software Developer | PRPM - OneKirana

March 2026 – June 2026

- Architecting core UI features for application modules serving Kirana stores using React and Next.js with efficient state handling.
- Collaborating on cloud workflows using AWS Lambda and setting up robust frontend automation via Git CI/CD workflows.
- Writing isolated unit and rendering component tests using Jest to maximize coverage and prevent UI regression.
- Developing supporting backend APIs using NestJS to handle asynchronous payloads and ensure smooth client data visualization.
- Was part of project planning, building and end-to-end development lifecycle phase.

#### Team Lead Web Developer | Swegon Bluebox Pvt. Ltd.

January 2022 – February 2026

- Lead an international cross-functional engineering team (Italy & India) to plan, build and execute industrial web interfaces for HVAC solutions.
- Spearheaded a critical UI architecture migration from Angular 2 to Vue.js 2 (Nuxt.js), and React (Next.js), enhancing runtime performance.
- Successfully migrated existing Vue 2 Projects to Vue 3 with Pinia and composition APIs.
- Engineered highly optimized frontend modules tailored to execute seamlessly on memory-constrained IoT micro-controllers.
- Designed interactive dashboard views with dynamic telemetry charts leveraging amCharts, Highcharts, and Bootstrap.
- Mentored and managed junior frontend developers in responsive layout patterns and state management strategies
- Setup Git CI/CD pipeline using Git Action to build and deploy the projects as and when a feature is completed.

#### Associate Software Engineer | CodeArray Technologies

August 2019 – August 2021

- Built the user interface for RETAILIGENCE, an AI suite focused on store clustering and assortment curation mapping using Vue 2, Vuex and Options API.
- Worked with Product Owners, UX Experts and in-house users to understand the requirements, design provided by the experts and build the frontend for the product while contributing best of my skills and knowledge.
- Closely worked with the Backend team to get data via Rest-APIs in Json format and visualize it in the form of bar-chart, clusters, tables using open-source libraries like Plotly, D3 Charts etc.
- Also used Vue custom components like Google Maps, Date Picker, SWAL Alerts, Multiselect Dropdowns, Moment.js, XLSX, etc.
- Other than this used Chrome Debugging tools as it helps lot to get the insights of API failures, memory leaks, and others.

### EDUCATION

Bachelor of Engineering in Computer Engineering — SAKEC, Mumbai University

2015 – 2019

### CERTIFICATIONS & INTERESTS

- **NextJS** up and running - **Udemy**
- **Vue - The Complete Guide** (Vue Router, Vuex, Composition API). - **Udemy**
- **Build Amazing Websites** (HTML, CSS, Sass, JS).
- **Languages:** English, Hindi, Gujarati (Fluent).
- **Interests:** Cooking Cuisines, Nature Travel.
